CSP203: Software Tools & Technologies Lab

Lab-7: Practice Problems (HTML)

Date: 6-Sep-2024

Instructions:
1. Prepare all your solution files in a zip file and name it as <ROLLNO.zip> and submit on canvas.

Problems:

1. Design a mini hospital website with the following features.
   a. Add an "About" page to describe the hospital mission and vision.
   b. Add "Doctors" page to list a few doctors, along with their photos and their specialisations.
   c. Add "OPD Schedule" page to list the various OPD services (ophthalmology, ortho, ENT) timings in the form of a table.
   d. Add a "Facilities" page for the facilities in the hospitals, such as Pathology, X-Ray, CT-Scan along with some relevant images. Add relevant photos along with captions.
   e. Add the "Contact Us" page with the address, phone number, may be google map location (optional).

Note: You may explore CSS (though not covered in the class) to make your website look attractive. The user should be able to navigate to any webpage from the homepage. You can look out for sample hospital websites to understand the features. You can copy relevant text and any other photos directly from the internet for your design.
